Yak-3 Module

- ★ YAK-3 Modules are improved for 25 pair splicing connections. They are for simplifying and speeding up the connecting work on cables with more than 200 pairs.
- ★ Special Splicing Rig accommodates reliable, cost effective multi-pair connection of conductors in any combination of 0,35-0,8 mm (27-20 AWG) with a maximum outer diameter of 1,65 mm.
- ★ U-contact principle strips the conductors insulation and completes a gas-tight, solder-equivalent termination. Excess wire is automatically trimmed by build in stainless steel cut off blades, when the Module is crimped.
- ★ YAK-3 Modules enable you to make all tests accomplished without opening the Module, stripping insulation or otherwise interrupting service.
